Đỗ Tùng Dương

Frontend-focused Full-Stack Developer · 5+ years React · 4 years Web3 · 3 years AI · Team Lead

duong98kk@gmail.com · 0969 374 623 ·

SUMMARY

Frontend-focused Fullstack Developer with 5+ years building scalable React applications. Experienced in Web3 products, payments integration (Stripe, RevenueCat), and AI-assisted development workflows (Cursor, OpenClaw). Led cross-functional teams of up to 5 engineers delivering production systems including wallet authentication, on-chain transactions, and mobile apps (React Native, Swift).

WORK EXPERIENCE

Tech Lead · Developer 2024 – Present
Lab3 · Web3

- Lead development for Web3 products; align technical delivery with business goals.
- Deliver end-to-end features across React frontend, Node.js/NestJS backend, and React Native/Swift mobile apps; Web3 flows (wallet auth, on-chain) used in production.
- Coordinate with design and stakeholders; contribute to roadmap when needed.

Tech Lead · Developer 2023 – 2024
Technixo · Web3

- Led cross-functional team of 5 engineers to deliver Web3 wallet authentication system used in production by 5k+ users (MetaMask, WalletConnect, ethers.js, on-chain transaction flows).
- Facilitated ceremonies and mentored interns; supported backlog and process when needed.
- Contributed to ideation and stakeholder communication.

Frontend Developer 2023
Homa · Web3

- Developed Web3 product features using React; wallet integration and on-chain flows (MetaMask, ethers.js).
- Collaborated with backend and design to ship production releases.

Frontend Developer 2021 – 2022
FPT Software · Web2

- Built and maintained React.js and Vue.js applications; collaborated with backend and design.

KEY ACHIEVEMENTS

- Built AI-assisted development workflows using Cursor and OpenClaw, automating code generation and testing across frontend and backend tasks.
- Led cross-functional team of 5 engineers delivering production Web3 systems (wallet auth, on-chain flows).
- Shipped Web2 and Web3 products; mentoring interns, collaboration with product and stakeholders.

LATEST PROJECT

Interns Market — AI Agent Marketplace
AI agent marketplace platform enabling domain-specific agents (e.g. voice conversion). Built MVP with Next.js and Supabase, serving early beta users. Responsible for frontend architecture and backend APIs. Team: 3 engineers (Tech Lead: myself; 1 FE, 1 BE; 1 QC).

TECHNICAL SKILLS

Frontend: React, Next.js, Vue, TypeScript, Redux/Zustand, Jest

Backend: Node.js, NestJS, Supabase

Web3: ethers.js, WalletConnect, MetaMask

Payments: Stripe, RevenueCat, App Store

Mobile: React Native, Swift

AI & workflow: Cursor, OpenClaw; Team Lead, mentoring

EDUCATION & CERTIFICATIONS

English — TOEIC 535 (2019), professional working proficiency

FreeCodeCamp — Responsive Web Design V8, Front-End Libraries V8, JavaScript Algorithms & Data Structures V7
